HEARS VOICE OF MURDERED MAN

Farmer Declares Ghost of Charles
Coleman Cries Out Near the
Fatal Spot.

EDWARD YOKEY FRIGHTENED

Knew Coleman in Life and Swears
he Can Easily Recognize the
Voice.

Edward Yoke, a well known farmer living east of this city, declares by all that is good and holy that every time after dark that he passes the spot where Charles Coleman was murdered, he hears agonizing cries and says he believes them to be those of the victim who was brutally killed at that place. The spot is a desolate one at night, being near the east end of the East Hill cemetery, an ideal abode for ghosts. Yoke was well acquainted with Coleman and declares he is positive that the voice he has heard is that of the murdered man. Yoke has changed his hours of going to and from home and says he has been frightened almost out of his wits on many occasions.

It is difficult to explain such phenomena and some of the world's most earnest scientists have made exhaustive investigations along this line. There is no doubt but what Yoke hears the voice as he says he does. He would have no occasion to tell a falsehood about the matter. From what source it comes would be difficult to determine.

The details of the Coleman murder are well known. He was killed about midnight by Leslie Bundrant, both colored, the latter being in love with his wife and in an insane and foolhardy state of mind decided to get the husband out of the way by killing him. Bundrant is now serving a life sentence in the prison at Michigan City. Mrs. Coleman has since married another man. But the ghost of Coleman lives—at least Yoke will swear to it.

BOLT OF LIGHTNING STRUCK RESIDENCE

Chimney Was Completely Demolished
on Home of John D. Megee
Last Night.

DID NOT SHOCK OCCUPANTS

Lightning struck the residence of John D. Megee in North Harrison street last night just a few minutes before seven o'clock, shortly before the heavy rain storm. The bolt struck the chimney and completely demolished it, but no further damage was discovered. The occupants of the house felt the jar, but did not receive any shock.

HAD A CLOSE CALL.

Greenfield Reporter: A valued spaniel belonging to Byron Sunderland, received a heavy dose of poison last Tuesday night, and it required the services of a veterinary to save his dogship from a separation with this mundane sphere. The dog is registered and was brought from the Pleasant Hill kennels in Pennsylvania.

Earl Churchill has accepted a position with the Churchill Grain & Seed Co., and will assume his duties upon his arrival there. Mrs. Churchill and children will move to Buffalo about August 1.

IVY CO. TO ATTEND MEMORIAL SERVICE

Plan to go to Knightstown Sunday,
June 13, in Automobiles For
Celebration.

ASK TO DONATE USE OF CAR

The Uniform Rank, Knights of Pythias third regiment will celebrate Memorial Day at Knightstown on Sunday, June 13. Ivy Company No. 35 of this city will attend in a body. There are about fifty members in the local company and they are planning to go in automobiles. Already several owners of machines have donated their services and the Knights are hoping that others will come out with the offer of the use of the touring car on that day. The members of the subordinate lodge have also received invitations and it is very probable that a number of them will attend. Anyone who wishes to donate the services of their machine will notify the committee on arrangements, Dr. Charles Green, G. P. Hunt or Floyd Hogsett.

KKK MINSTRELS AND VAUDEVILLE

Big Effort Being Made to Secure the
Grand Theater For Monday
Night.

THE GIRLS WERE IN A FLIGHT

On Account of an Unsettled Matter—
Seat Sale Will Open Saturday
Morning.

You never saw a more wrought up and perplexed little bunch of clever young girls than the members of the local Tri Kappa sorority. After they labored hard for over three weeks in rehearsing a ladies minstrels and vaudeville show, they got word almost on the eve of the production that the owners of the Grand theater had decided to keep the theater dark hereafter and not rent it for public gatherings. The State inspector had ordered some repairs made, but an extension has been secured on the time set and now may be possible to get permission of the owners. At any rate, the Tri Kappas and all their friends are praying and hoping that such will be the case. It would be a shame to have to take the show out of the city in order to present it. People here are anxious to see it and no doubt there would be a run for tickets if the board was up today as was first arranged.

Last night the girls met and set tonight to decide on one of four things: First, that the show would be put on at the Grand theater here next Monday night, as advertised; second, that a special train be secured and the production taken to Greensburg, where they have one of the finest theaters in the State; third, that a stage be fitted up in the Krammer rink here and the show given there, and fourth, that they would postpone indefinitely. It was a strenuous meeting, that last night. Some were on the verge of tears, while others were up in the air with a look of determination written on their faces.

"Let's give the show at all hazards" was the tenor of the many emphatic exclamations of the girls.

The dark cloud took on a silver lining today—at least for the time being—when it became known that Mr. Watson had wired State Inspector W. E. Blakely to come to Rushville and after consulting with the owners, give the necessary permission to use the theater next Monday night. And for that end Mr. Blakely is coming tomorrow. There is nothing out of reason to be requested and neither are the owners to blame for taking every precaution to be on the safe side. If satisfactory arrangements are made—and we believe they can be—the seat sale will open at Hargrove & Mullin's store Saturday morning at eight o'clock. Reserved seats will be sold for fifty cents and judging from the history of the past, in connection with home talent affairs of this character, there will be a grand rush for seats. The show promises to have some of the best features ever put on by amateurs in Rushville.

GRADUATES AT PURDUE.

Joe Ong, son of Oliver Ong, former superintendent of the Rushville water and light plant, will graduate at Purdue next week. The Columbus Republican says: "Mrs. Oliver Ong will go to Lafayette Thursday to attend the commencement exercises at the West Lafayette high school, her son, John, being one of the graduates. She will remain for the commencement exercises at Purdue, as her son, Joe Ong, graduates from the electrical engineering department June 9."

MEN'S BANQUET A BIG AFFAIR

It Promises to be One of the Season's
Most Delightful Social
Events.

PATRIOTIC PROGRAM PLANNED

Dr. Parsons Will Officiate as Toast-
master and Good Talent Will
Respond.

The men's banquet at the Main Street Christian church tomorrow night promises to be one of the most delightful social occasions ever given in Rushville. It will be for all the men of the Main Street Christian church and their friends. The program will be of a patriotic nature in view of the proximity to Decoration Day. A special invitation is extended to all the old soldiers whether members of the Christian church or not to be present. Dr. C. H. Parsons will act as toastmaster and the following will be the list of toasts: Song by B. F. Miller.

Speech, "Our Country" by Dr. Kingsinger.

Reading, "Good-By Jim" by Bruce Cline.

Speech, "Our Nation's Defenders" by Carl Nipp.

Song by Jesse Pugh.

Speech, "Our Flag" by Dr. Chadwick.

Speech, "Brotherhood" by Rev. R. W. Abberley.

The dinner will be served by the Ladies Aid Society at 35 cents per plate promptly at 6:30 o'clock. It will be another of those fine dinners, for which the ladies of the Christian church are famous.

The spirit of good fellowship will reign throughout the evening and all strangers will be made welcome.

RAIN STORM WAS THE WORST EVER

Played Havoc With Farmers' Calculations—Planting in Lowlands Damaged.

TOO MUCH OF A GOOD THING

The rain has played havoc with the farmers' calculations as they were compelled to stop planting corn, re-planting or cultivating that already up, as the case might be. That planted in lowlands will be badly damaged if the rains should keep up any length of time, as the grain will rot in the ground. If already up the young sprouts will turn yellow and die. A good soaking rain, however, was needed, but warm weather along with it would have been much more appreciated. The rain storm of last night was one of the most severe that ever fell here.

HADN'T SEEN HER FOR MANY YEARS

But Jesse Winship Recognized the
Animal he Sold Just Nineteen
Years Ago.

SHE WAS A GOOD OLD WAGON

It was just like meeting one of the family who had been absent from his place at the fireside for years. Yesterday Jesse Winship was standing on a down-town street when Rus Bebout drove along with an old horse. Winship stopped him. Questions and answers flew thick and fast. Soon Winship was seen to nod his head, a smile spread on his face and a tear trickled down his cheek. It developed that the old horse was none other than the once famed race horse "Pearl Winship." Winship had not seen her for nineteen years when he sold her to parties living east of here. But he knew the "old girl" the minute he "sot" eyes upon her. Bebout got the animal in a trade recently. Pearl Winship had a record as a three-year-old of 2:19.

THE SECESSION SPIRIT IS RIFE

Fayette County May Take on Territory From Franklin—Many
Advantages.

TRADING POINTS ARE BETTER

As Much Franklin Trade Goes to
Connersville and Rushville—
Many Want the Change.

It came to the News Wednesday from an authentic source that a movement will soon be set on foot to change the geographical lines of two White Water valley counties, says the Connersville News. The idea is not entirely new having been considered in a desultory way, before, but the recent election in Franklin county seems to have given the movement an impetus and power that it never had before.

The idea in brief, is to ask legislative sanction to the transfer of the townships of Posey, Laurel and Blooming Grove from Franklin to Fayette county. All of these are border townships abutting on Fayette county. The three townships contain seventy-two square miles. Laurel, the largest, has thirty-two square miles of territory; Blooming Grove has twenty-two and Posey, eighteen miles. Franklin is one of the largest counties in the State with 380 square miles. Fayette has 212 square miles and with this addition it would have 284 miles of territory, while Franklin would have 308 miles left, or would still have twenty-four miles more of area.

Politically the change would have no effect further than to make Fayette county a little more surely Republican and Franklin a little more hopelessly Democratic, the three townships usually returning small Republican majorities. With many people in these townships Brookville has been little more than a place to pay taxes for years. A large part of the trade from Blooming Grove and Laurel townships came to Connersville, while much of that of Posey township comes here or goes to Rushville, which is nearer and on a much better road. Laurel, where most of the people of either township take a train, is three miles nearer to Connersville than to Brookville. So it is seen beyond any feeling that might be aroused over their defeat in the recent option election there are many good reasons that would weigh with thoughtful men if a choice of county seats were presented to them.

But the feeling over the election is deep seated for it has accentuated a feeling that has long prevailed that Franklin county has no real representative government that is in touch with the advanced spirit of the times. The "Solid South" as the southwest section is called, has ever been and will continue to be an unassailable power. Democrats in these border townships get scant recognition as a rule. Socially there is little in common between the north and east portions of the county and the southwest and the latter dominate practically all things at the county seat.

We wish to notify the people about two men who were canvassing for pictures and said they were working for a company in Indianapolis and were putting up in Rushville. They were through here last Friday and reports came from different directions that they have been telling that Howard F. Presnall works in their office and does their work or looks over the work if anyone wants him too. This is as big a falsehood as was ever told.

Howard F. Presnall was a portrait artist of wide reputation and had his studio at his home here in Sumner, but gave up the portrait work and accepted a position as a mechanic illustrator in the art department of the Indianapolis Engraving and Electrotyping Co. When anyone wanted any portraits made his father D. M. Presnall, would have the work done by a company in Indianapolis and he would sometimes correct the work if it needed it. This is all he has had to do with portrait work in four years and positively does not work in the office of any portrait company in Indianapolis or have anything to do with these men. We know they have gotten pictures under false pretense, so if your work does not please you do not blame Howard F. Presnall for he has nothing to do with it.

Frank Hankins was a visitor at Shelbyville Monday evening.

The boom of the shot gun in the quiet of the evening about six o'clock Sunday afternoon attracted the attention of our citizens Sunday evening. Three shots were fired in rapid succession in the neighborhood of Dr. Green's residence. The curiosity of those who heard the reports caused a crowd to soon collect to learn what had happened. Many feared that murder had been attempted, but it was found that it was owing to the bad marksmanship of Mayor Lew Lewis, who was pursuing with intent to kill, a large black dog which had wandered into town and was acting strangely. Fear of rabies had unnerved Lew until his usual accuracy with firearms failed him. But the third shot at a few paces put his dogship out of his misery, as it is generally believed that it had got a dose of poison causing the strange actions. After it was officially pronounced dead, Lew proceeded to dig a grave and gave the unfortunate animal proper burial. It was the proper thing to do to end the poor dog's suffering and take no chance of some child or even another animal being bitten.

Dr. Pierce's Favorite Prescription

Is the best of all medicines for the cure of diseases, disorders and weaknesses peculiar to women. It is the only preparation of its kind devised by a regularly graduated physician—an experienced and skilled specialist in the diseases of women.

It is a safe medicine in any condition of the system. **THE ONE REMEDY** which contains no alcohol and no injurious habit-forming drugs and which creates no craving for such stimulants.

THE ONE REMEDY so good that its makers are not afraid to print its every ingredient on each outside bottle-wrapper and attest to the truthfulness of the same under oath.

It is sold by medicine dealers everywhere, and any dealer who hasn't it can get it. Don't take a substitute of unknown composition for this medicine of known composition. No counterfeit is as good as the genuine and the druggist who says something else is "just as good as Dr. Pierce's" is either mistaken or is trying to deceive you for his own selfish benefit. Such a man is not to be trusted. He is trifling with your most priceless possession—your health—may be your life itself. See that you get what you ask for.

WETS COUNTING ON TWO TODAY

Floyd and Laporte Counties They Claim For Thems—Both Sides Playing Close Politics.

MORE OPTION ELECTIONS

Floyd, Laporte and Harrison Counties Voting Today—Saloon Interests Claim Two Counties.

New Albany, Ind., May 27.—The county option election being held in this county today is the most hotly contested election that was ever witnessed in this county. It is the first time that the saloon and the anti-saloon forces have met in contest in this city.

There is not a ward in the city that is "dry" by remonstrance, and there are an even 100 saloons scattered about promiscuously throughout the city. Men, women and children are at work at the polls today. At every voting precinct in the city women are at work in the interest of the "drys," and in not a few instances children are taking part in the election work. Both sides continue to assert that they are confident of victory.

The "wets" issued a statement in which they say that they will carry the county by a majority of 1,600, while on the other hand the "drys" declare they will win by a majority of 500 to 1,000. Old and experienced politicians declare that they can not get a line on the result of the election, and the count of the vote, which it is expected will be completed within an hour from the time the polls close, is awaited with interest.

BIG VOTE IN LAPORTE

Both Sides Express Determination to Win.

Laporte, Ind., May 27.—Both sides appear confident of the issue of today's battle of ballots between the wets and drys. Up to this hour a heavy vote has been cast, and it is believed fully 90 per cent of the total vote of the county will be polled.

Chairmen Darrow and Smutzer of the wets state that they have no reason to revise their figures, and the claim is made that Laporte will more than duplicate the record made by Posey county.

The drys are more confident today of a victory than at any time since the opening of the campaign, laying claim to nineteen of the townships outside of the cities of Laporte and Michigan City. The dry leaders say the wet majorities in the cities will be far below the estimates, which are: Michigan City by 1,500 and Laporte by 400. They say the silent vote will largely favor them. The wets have maintained the most thorough and compact organization in the history of Laporte county politics, and politics has been played with regard for the minutest details.

MANY CONGRATULATIONS

EVANSVILLE FACES STREET CAR STRIKE

Traction Company Rejects Proposals of the Unions.

Evansville, Ind., May 27.—It now seems certain that the street car conductors and motormen will go on a strike either Friday or Saturday morning. Last evening the officials of the Evansville & Southern Indiana Traction Company, which concern operates the local lines, sent a long letter to the Evansville Central Labor Union refusing to submit the differences between the company and men to a board of arbitration so long as the recognition of the union was the basis of the settlement. This letter was a reply to one sent to them by the Central Labor Union asking them to submit the matter to a board of five for arbitration. It is officially stated today that at the regular meeting of the Central Labor Union, tonight the strike will be endorsed and that later in the night the car men will meet and go out either Friday or Saturday morning. They are inclined to wait until Saturday morning to strike as they desire to give the public 24 hours notice.

AMERICANS LOST

Thousands of Good Yankee Plunkers Dropped at Epsom.

Epsom, May 27.—King Edward's brown colt, Minoru, justified his name, which is Japanese for "Success" by winning the Derby, which will be remembered always in the annals of Epsom as one of the finest ever run on that historic track. W. Raphael's Louviers, with France's star jockey, Stern, on his back, came under the wire so close attendant on Minoru that the spectators were undecided which led until the king's number was displayed on the blackboard.

Lord Mitchellham's William the Fourth, was a good third and half a dozen of the 15 starters were well bunched behind. But one horse was seen following the field riderless. It was the American-bred colt, Sir Martin, which everyone had reckoned as Minoru's foremost rival. He had been crowded out of his stride just beyond the Tattenham corner, about the middle of the course. Jockey J. H. Martin shot over his mount's head to the ground, as Sir Martin stumbled and with him fell the hopes of hundreds of confident American onlookers, and many thousands of American dollars were lost.

Despondency Caused Suicide.

Cincinnati, May 27.—August W. Lotze, president of the Lotze Hot Air Furnace and Range company, committed suicide at his home here by shooting himself in the mouth. Despondent because he was fast becoming deaf and worrying over business affairs are believed to have caused him to end his life.

North's Resignation Accepted.

Washington, May 27.—S. N. D. North, director of the census, has tendered his resignation to President Taft and it was accepted. E. Dana Durand, deputy commissioner of corporations, has been named to succeed Mr. North.

ENVIEABLE IS HER REPUTATION

Julia Ward Howe Today Reached Her Ninetieth Milestone.

ATTAINED GREAT SUCCESS

Famous Woman Suffragist Was Recipient of Flood of Congratulations.

Julia Ward Howe, "the grand old woman of America," was today the recipient of a veritable flood of congratulations upon having attained the venerable age of 90 years. The celebration was national in extent, as every woman of every suffrage league in America did honor to her aged leader by devoting the day to securing signatures to the immense petition for votes for women to be presented to Congress at the next session.

Julia Ward Howe still is active in the cause of woman suffrage, and it is not long since she addressed a Boston audience for twenty minutes on the subject. Her name will be used to quicken the sluggish and to win new devotees to the cause.

No injunction as to the manner of working has been laid upon any of the members. It has only been stipulated that as it is the ninetieth birthday of Mrs. Howe, every woman will obtain at least fifty signatures.

The petition will be subdivided, each profession having its own department. The college presidents' petition is headed by David Starr Jordan, president of Leland Stanford University. Mrs. Minnie J. Reynolds is in charge of the writers' petition. Miss Jessie Ashely, a lawyer, is one of the professional women that have recently joined the movement. She has circulated the petition among men and women lawyers.

It is expected that the results of today's concerted effort will be remarkable in extent and highly pleasing to Mrs. Howe.

Mrs. Howe is now a resident of Boston, but was born in New York City on May 27, 1819. She developed no pronounced views during her girlhood and young womanhood, and it was not until she had become the wife of Dr. Samuel G. Howe, the philanthropist, that she entered upon the reform work with which she has since been connected. She became a pronounced abolitionist before the war had freed the slaves, and was co-editor with her husband of the Boston Commonwealth, an anti-slavery journal. Her greatest fame was attained during the first year of the civil war, when she wrote the "Battle Hymn of the Republic." Her inspiration for this musical effort, which won immediate and lasting fame, was a visit to the camps of the Union soldiers near Washington.

Among her works, besides several volumes of verse and a volume of music, published on her last birthday, are "The World's Own," a drama written in 1857, and "The Life of Margaret Fuller."

THE COMING WEEK DAY BY DAY.

Among the important news events scheduled for this week are the following:

OLD SOLDIER WAS ROBBED OF PENSION

War Veteran Visiting in Greensburg Was Pushed Down Embankment by Two Men.

GRAB HIS WALLET IN MELEE

On the heels of the robbery of David Weeks of his gold eagle and loose change, while taking a dream, the refrain of which was "Soldier, sleep thy warfare's o'er," Jacob Hoff tells about the same story—only bigger says the Greensburg Review.

Mr. Hoff, who is a guest of the Marion Home and in the same camp with Mr. Weeks, had drawn his pension—the money eked out by the government to its defenders to help them along in the decline of life, as they totter down the sunset side of the hill, on the last march—was robbed.

PENNSYLVANIA PLANTING TREES

The Railroad is Providing Cross Ties For Future Repair Work.

OVER ONE MILLION THIS YEAR

Set Out This Year, Making a Total of Three Hundred Million in Three Years.

The Pennsylvania Railroad Company will plant more than 1,000,000 trees, making a total of 3,430,000 set out during the last three years to provide for future needs in timber and cross ties. In addition to its own activities the road has furnished, practically at cost, a large number of young trees and hedge plants to private corporations and individuals.

This spring 65,000 trees are being set out on tracts of land near New Brunswick, N. J. Within the month there will be planted in addition 207,000 trees near Conewago, Pa.; 186,000 in the vicinity of VanDyke; 334,000 at Lewiston Junction; 7000 at Pomeroy, and 206,000 at Denholm.

The bare places in the locust trees plantations, which were started some years ago, are being filled in with new seedlings in order that these may follow as a second growth after the older trees have been removed for fence posts and other purposes.

Indicative of the scope of the forestry plan of the company this year is the fact that at the Morrisville nursery alone approximately 1,250,000 trees have been dug, bundled and shipped to places along the railroad. The area occupied by these trees has been plowed, fertilized and is to be replanted with about 200 bushels of acorns. Half a million coniferous seedlings which were grown last year, are being set in transplant beds to remain for a year before being set out permanently.

Smart Tips For Men

A striking shirt with a design of pansies on the plaits and on the cuffs was displayed in one of the shops last week.

Among the specials for fall wear is a three-button sack, fancy flaps, deep welt and imitation vent on the sleeves.

Dark green and brown are among the colors of the straw hat bands. There are many other fancy bands.

The adaptation of the popular military form of collar to the sweater coat is a novelty in that line.

Fancy flannel trousers for wear with blue serge coats are being worn extensively.

Mr. Hoff says that he was met by two men, who rudely jostled him, and pushed him down an embankment, and after recovering from the stun of the fall, he discovered that his "wallet" had been grabbed. The money loss, he claims, was fifty dollars—"two twenties and a ten."

The matter was reported to the police, and it is to be hoped that a diligent search may lead to a recovery and return of the money to the old soldier.

He will spend the few days of his furlough visiting with his friends and relatives. He walked today to the home of Mr. Hooten, his grandson, a few miles east of town, for a pleasant visit.

How to Cure Skin Diseases.

The germs and their poisons which cause the disease must be drawn to the surface of the skin and destroyed.

Zemo, a scientific preparation for external use will do this and will positively cure Eczema, Pimples, Dandruff and every form of skin or scalp disease. See photos of many remarkable cures and show case or window display at F. E. Wolcotts drug store. Ask for sample.

It is stated that the Western Motor Works, employing several hundred men, is to be moved from Logansport to Marion, where the size of the plant will be greatly increased. Commenting on the change the Fort Wayne News says: "Just why the change of location is made is not stated, but it is presumed that it is so infernally wet in Logansport these days that the company's employees get mired while going to and from work."

The sentence received by Bennett, Barrett and Butts, the three young men found guilty of holding up and robbing, should be an object lesson to some of the young men around town. The operations of these three criminals were by no means profitable. Had they worked at even moderate wages they would have earned much more money than their hold-ups brought them, to say nothing of the term they will now have to spend at the penitentiary.

A herd of milk goats from Switzerland has been received by the Wisconsin agricultural experiment station, to be tested for the usefulness of these animals for milk production. It is claimed that the milk is peculiarly adapted for infants and invalids, the goat being practically immune to disease. All over continental Europe goat milk is largely used for coffee milk. This may be a suggestion of a way out of the milk problem. If goats can be substituted for the cow it will give a chance for city dwellers to have their own milk supply by keeping a goat. Goats can

be kept cheaply, as they feed on scrap paper, old tin cans—in fact most any old thing.

The murder of Mayor Carmody of Cedar Rapids, Iowa, by a burglar, is a parallel case to the shooting of Edward Payne here by a burglar some years ago and is just one more instance demonstrating the folly of a man leaping out of bed to attack the midnight invader of his home. There is something repugnant, it is true, about either lying still when a burglar is in your room, or in merely making a noise to frighten him away if he is heard in another part of the house, but for all that, it is the part of wisdom. Occasionally, to be sure, the householder obtains the opportunity to drive daylight through Mr. Burglar, while running no personal risk himself, but as a usual thing the advantage is all on the other side. The burglar who in the dead of night enters a house is a desperate man, prepared to do murder if he is attacked. He has every advantage, too, as he is alert, armed, and ready for action at a moment's notice. Against such a one the bewildered householder, roused from sound sleep, and plunging excitedly to combat, stands small show, and it may be advanced as a general thing, in the case of burglary, discretion is the better part of valor. Every year hundreds of men lose their lives in a defense of their homes that is as needless as it is reckless.

PRESBYTERIANS DENY WANING OF DEVOTION

Family Worship Not a Thing of the Past, They Say.

Denver, Colo., May 27.—A resolution beginning, "Whereas, family worship is a thing of the past," caused a commotion in the general assembly of the Presbyterian church. The innocent looking sentence was discovered by Vice Moderator Holt. There was under consideration at the time the report of the committee on publication and Sunday school work, and several amendments had been offered. Dr. James H. Frazer of Baltimore offered a resolution calling upon the pastors, in view of the fact that family worship had become a "thing of the past" to organize the youth into more efficient Sunday school work in order to bring them more effectually into the care of the church.

Vice Moderator Holt said he believed the resolution to be all right with the exception of the "worship" clause. Soon half a dozen watchful commissioners were on their feet demanding to know if the objectionable sentences would stand and thereby put the church on record as saying worship in the home is a thing of the past. Dr. Roberts, the stated clerk, made a quick correction, using the word "neglected," and trouble was avoided.

Resolutions deploring the dismissal of Robert Watchorn as commissioner of immigration at Ellis island and the action of the Belgian government in prosecuting W. H. Morrison and W. H. Shepherd, both missionaries in the Congo district, were adopted.

INDIANA POLITICS

ROBERT G. TUCKER.

Indianapolis, May 27.—L. P. Newby, former member of the state senate, says that Indiana is going Republican again.

"Mr. Beveridge will have no opposition for renomination. You may make that statement as strong as you like. I have always been credited with belonging to the opposite faction of the Republican party in Indiana, but I can say without qualification that there is no fight among the Republicans of the Hoosier State, and that when the time comes there will be no opposition to Senator Beveridge. That he will be renominated and re-elected, I have no doubt. I have heard a lot about factional differences among the Republicans in Indiana, but we who are familiar with Indiana state politics know better. Senator Beveridge will be unopposed for the senatorship. It is not believed by any Republican in Indiana that the state will be carried by the Democrats in the next election. Ben Shively is an excellent man, and I would rather have seen no other Democrat elected, because he is a man of ability, energy and brains. Personally, we all admire him, but politically, of course, we are against him."

Signs of trouble among the Thirteenth district Republicans are already showing on the surface. The launching of a boom for James R. Frazer of Warsaw has aroused the followers of John L. Moorman of Knox, who was defeated for the nomination last year by Charles W. Miller. The Winamac Republican, edited by Carl W. Riddick, secretary of the Republican state committee, says that while Frazer's ambition to become a statesman is laudable, he is young and can afford to wait a while. Then Riddick proceeds to launch a new boom for Moorman, praising his services as district chairman and his friendly attitude toward Miller for his defeat in the district convention last year. Riddick calls attention also to the fact that five of the seven counties of the district favored the nomination of Moorman last year and were outvoted by St. Joseph and Elkhart, the larger counties. Under the circumstances Riddick thinks that Moorman should have the call for the place. It is believed that the Riddick-Moorman element is getting ready to fight to the finish in order to land the nomination for Moorman.

The Third district promises an interesting contest among the Democrats. Congressman Elijah Cox has no idea of giving up his seat and is now a candidate for renomination. George Voight, prominent attorney at Jeffersonville, is announcing to his friends that he wants the job and will go after it. A race between Cox and Voight

will stir up the district almost as much as the memorable contest between Cox and ex-Congressman William T. Zenor. Voight was one of Zenor's managers. He is regarded as one of the shrewdest politicians in the district and it is expected that he will have behind him all of the Zenor following and the race will mean another line-up of the Cox and Zenor factions.

Complaints are coming to the state board of medical registration and examination that doctors in "dry" territory have been guilty of misusing their powers to prescribe liquor for a consideration when sought for that purpose by the thirsty.

GRIFFITHS PROMOTED

Indianapolis Man Will Go to London as Consul-General.

Washington, May 27.—Consul-General Robert J. Wynne, at London, has resigned and John L. Griffiths of Indianapolis, consul at Liverpool, will succeed him. Mr. Griffiths' services as consul to Liverpool have frequently been commended by the state department. His reports sent to Washington from time to time on trade conditions have been very comprehensive. It was hinted several months ago that the administration would promote Mr. Griffiths at the first opportunity.

It can be said that the promotion of Mr. Griffiths is on merit alone, and it is the best illustration so far of the determination of the present administration not to use the consular service for political purposes. The Liverpool consulship pays \$8,000 a year; the London consul-generalship \$12,000 and certain fees, which bring the pay up to about \$15,000 a year.

Babe Found in Cesspool. Cincinnati, May 27.—The body of a girl baby was found in a cesspool in the rear of a vacant house at 624 Central avenue. A portion of a blue dress was wrapped about the body. The skull was apparently crushed in, but investigation by the coroner showed that the sutures of the skull had opened and the bones had fallen apart during the process of decomposition.

Fatal Wedding Day. Bay City, Mich., May 27.—Married yesterday morning to Anna Kaiser, Roland Rich, twenty-five years old, was in the afternoon arraigned on the charge of murdering his aged grandmother, Mrs. Christine Corrye, who was found dying in her bedroom with her skull fractured.

Gary Gets Next Meeting. Indianapolis, May 27.—Robert H. Bryson of Indianapolis was elected president of the Indiana State Association of Presidential postmasters, and Gary was selected as the next meeting place of the association.

COMPASS RECORDER.

Lake Sailor Invents Device For Tabulating Vessel's Course.

John Schuette, formerly of Menominee, Mich., and a well known lake seaman, who for several months past has been experimenting with his new compass recorder, has announced to Menominee marine men that the device has been pronounced perfect by experts and that he will soon have it on the market.

The instrument, the first of its kind to be brought to perfection, is said to be able to record the course of a steamship or sailing vessel every moment the boat is in motion. By means of electricity and a series of disks and keys a long strip of paper marked by the points of the compass and hours of the day is traced by a thin stream of ink, so that the captain from his private room can without moving see exactly the course of the vessel.

The device also serves to keep tab on the wheelsman, for it is impossible for him to disobey orders without being detected.

A Tale of a Tub.

"Ella, come here!" yelled John Sharp of Winsted, Conn., to his wife from the bathroom the other night. He had sat down in the tub of hot water just after it had received a fresh coat of enamel. He was stuck on the bottom of the tub when his wife arrived. After working four hours he got the enamel off his body. Mrs. Sharp had forgotten to tell her husband the tub had been re-enamelled.

The marriage of Frank Hays of Greensburg and Miss Jessie Tompkins, a charming young lady of Milroy, will be solemnized this evening (Wednesday) at 8:30 o'clock at the home of the bride's mother, Mrs. Ira Tompkins, the Rev. W. H. Smith of Connersville, officiating, says the Greensburg News.

The Tompkins home will be splended in handsome embellishments and a profusion of decorations with an effective color scheme will greet the eyes of the numerous guests that will be present.

Following the ceremony Mr. and Mrs. Hays will likely go to Chicago, where they will spend a honeymoon of a few days, after which they will return to this city and reside at 318 North Michigan avenue.

The bride is one of Milroy's favorite daughters. She is talented and accomplished in many ways, and last year was a teacher in the Milroy city schools. Mr. Hays is a former Milroy resident, but for some time past has been employed at the Roy Privett garage in this city. He is a young man, well met, with a pleasing disposition that wins him many friends, all of whom join the News in extending congratulations, with the wish that bright flowers of happiness may ever find life along their path.

LABOR SAVING DEVICE

Scheme to Aid the Women Workers on Farms.

HOW A LAUNDRY WOULD HELP

Modern Dairies, For Instance, Require Sanitary Washing of Workers' Suits. How One Laundry Could Be Used by a Number of Families.

The modern clean, convenient and hygienic dairy barn means a great deal of additional work for the farmer's wife and her helpers, for suits must be washed, and there is a general increase in laundry and similar work. It is only just that these added burdens should be offset by more conveniences and labor saving devices. In general it is not true that the farm home has kept pace with the rest of the farm in the adoption of farm methods of labor saving devices and other conveniences.

A widely known dairy commissioner who had given the matter considerable thought suggested that a laundry such as he had in mind could be used by a number of families in a neighborhood on the payment of a small fee. Such ideas of co-operation applied to rural life are interesting as well as valuable and an indication of a means by which the farm housewives' labors may be lessened in a number of ways. A co-operative bakery or laundry seems as practical as the co-operative creamery which is now so common in the middle west.

The suggestion is as follows:

A laundry provided with stationary washtubs, with washer and wringer for power use, is an innovation. But why should not the women of the farm be provided with modern appliances? The farmer no longer reaps with a sickle or even with a cradle. He rides his plow and often his cultivator. He rides his grain drill, corn planter and corn cultivator. He rides his grain harvester and his corn harvester. He loads his hay by machinery and pitches it into the barn by horsepower. The time is come when it is positively inhuman to ask women to toil without water or machine power in the house. The same water, steam and sewage system that must be present for the dairy will take care of the laundry. The same power used for grinding feed and separating milk or pumping water and sawing wood will turn the washer and wringer.

Stationary tubs of three compartments, power washer, wringer, piping and connections and drying room will cost in the neighborhood of \$140, and the interest on this amount is \$9.80; the deterioration, assuming that they will have to be replaced in fifteen years, equals \$9.35 a year, or a total of \$19.15, to be correct, or, say, \$20 even money.

That is 38 cents a week, to which add 10 cents a week for gasoline used by the engine. If the farmer were compelled to kill and dress two hogs every week throughout the year he would not hesitate to spend 50 cents a week for machines which would save so much labor and enable him to do more work in less time. A power ironer costing about \$60 could be added if "he" took a notion to be liberal in the matter.

A drying room 6 by 12 feet between the dairy room and the laundry room, provided with steam pipes for heating, will not cost a great deal and insures quick, clean and easy drying of clothes in any kind of weather and will save "her" a good many trips out in inclement weather. A power laundry like this may be rented to neighbors for, say, 50 cents a day, they to come to the place and do the work and clean up the plant after they are through. —Washington Cor. Kansas City Star.

CANNON "ON THE JOB."

Will Stick to Congress, He Says, and Be Buried at Public Expense.

Speaker Cannon and a party of congressmen who arrived in Winchester, Va., the other day in a large touring car were entertained at the home of Mrs. Shirley Carter.

Mr. Cannon, when asked if he had any intention of retiring from politics, said:

"My constituency are very kind to me, and as long as they continue to want me I'll be on the job. I cannot bear the idea of giving up and loafing around while the other fellows are at work, having fun. I'll stay until I die and then be buried at public expense."

Carried 141,659,543, Killed None.

Reports recently compiled of all accidents on the 23,000 miles of track of the Pennsylvania railroad system for the last year show that during 1908 the various lines of the system carried 141,659,543 passengers and that not one single passenger was killed as the result of a train accident. The system carried 11,344,418 less passengers than in 1907—a loss of 7.4 per cent, but the total number of passengers injured in train accidents numbered only 102, a reduction of 452 or 81.6 per cent from 1907.

CONTEST ELECTION.

(Greenfield Reporter.)

The arguments on the motion of attorneys for liquor men attacking the legality of the recent option election will come up for argument before Judge Mason on the conclusion of the trial of the case of Brinkmeyer vs. Walker, on account.

FACTS OR FICTION?

(Greenfield Tribune.)

Franklin county went wet and it is no wonder. Two of its county commissioners own and operate saloons, and one of them compels his thirteen-year-old boy to tend bar. The third commissioner's son is a brewery agent and the superintendent of the county poor farm is a distiller; he evidently has worked the inmates at both ends of the line. The voters at the poor farm were all marched to the polls and voted wet. In one section of the county there is a saloon within the shadow of a church, and the smallest thing in that community is the school house. Poor old Franklin!

A CINDERELLA STORY.

(Greenfield Reporter.)

C. L. Beechler, of Chillicothe, Ohio, will soon take charge of the office of county clerk. Mr. Beechler is a printer and formerly worked for the Wm. Mitchell Printing Co. of this city. In fact he was working with that company at the time he was nominated. He made no campaign for the nomination nor election and it came about in this way: The county is strongly Republican and a nomination on the Democratic ticket had usually been an empty honor. There being no candidates seeking the place and Mr. Beechler being a popular young man, his friends placed his name before the convention and he was nominated against his wishes. Mr. Beechler did not even go home to vote but the Republicans were dissatisfied with their party's administration and so bolted the ticket in such a way as to make a landslide for the Democrats. Mr. Beechler was elected by a nice majority and will soon be installed in a good fat office for at least four years. He never spent a dollar to get the place.

NEWLYWED'S TROUBLES.

(Connersville News.)

By reading between the lines certain handbills scattered broadcast on the streets today by a party of young men from Muncie, one can imagine that a certain prominent couple, whose lives are to be joined in wedlock this evening are not going to be permitted to accomplish their "get away" on their honeymoon trip without incidental interruption and publicity. One bill reads as follows: "Married. Erl and Esther. I Love My Wife! But oh! You Kid. May 26, '09."

Here is another: "May 26, '09. Transmanifcanbandamuality. For Information ask Erl or Esther."

Here is the last, and probably the worst, as a jar to the sensitive nerves of the otherwise happy pair: "Notice! Extraordinary Attraction. Realistic Extravaganza. Lately Engaged. Earnestly Endorsed by the Pulpit. Another Success. Now Running Separated Until Tonight. Desiring Your Presence (Presents). Erl, Successor to Transmanifcanbandamuality, Having With Him Esther. R. S. V. P. May 26, '09."

Relief from catarrh, coughs, colds,
 hay fever, asthma and bronchitis,
 can be had in five minutes simply by
 breathing the soothing, healing,
 balsamic air of Hyomei over the sore
 and raw membrane.

It acts like magic. When you
 breathe Hyomei you bring the air
 from Australian forests of pine and
 eucalyptus to your home, and the
 curative power of both is so pro-
 nounced that all diseases of the nose,
 throat and lungs are unknown in in-
 land Australia.

Hyomei (pronounced High-o-me)

MI-ONA Cures Indigestion

It relieves stomach misery, sour stom-
 ach, belching, and cures all stomach dis-
 ease or money back. Large box of tab-
 lets 50 cents. Druggists in all towns.

She watched him, a little piqued by
 his absentminded mood for a moment,
 then, and not without a trace of malice,
 "Must I tell you again what to
 talk about?" she asked.

"Forgive me. I was thinking about
 if not talking to you. I've been won-
 dering just why it was that you left
 the Alethea at Queensborough to go
 on by steamer."

And immediately he was sorry that
 his tactless query had swung the con-
 versation to bear upon her father, the
 thought of whom could not but prove
 painful to her. But it was too late to
 mend matters. Already her evanescent
 flush of amusement had given place to
 remembrance.

"It was on my father's account," she
 told him in a steady voice, but with
 averted eyes. "He is a very poor sail-
 or, and the promise of a rough passage
 terrified him. I believe there was a
 difference of opinion about it, he dis-
 puting with Mr. Mulready and Captain
 Stryker. That was just after we had
 left the anchorage. They both insisted
 that it was safer to continue by the
 Alethea, but he wouldn't listen to them
 and in the end had his way. Captain
 Stryker ran the brigantine into the
 mouth of the Medway and put us ashore
 just in time to catch the steamer."

"Were you sorry for the change?"
 "I?" She shuddered slightly. "Hardly!
 I think I hated the ship from the mo-
 ment I set foot on board her. It was a
 dreadful place. It was all nightmarish
 that night, but it seemed most terri-
 ble on the Alethea with Captain
 Stryker and that abominable Mr.
 Hobbs. I think that my unhappiness
 had as much to do with my father's
 insistence on the change as anything.
 He was very thoughtful most of the
 time."

Kirkwood shut his teeth on what he
 knew of the blackguard.
 "I don't know why," she continued,
 wholly without affectation, "but I was
 wretched from the moment you left
 me in the cab to wait while you went
 in to see Mrs. Hallam. And when we
 left you at Bermondsey Old Stairs,
 after what you had said to me, I felt—
 I hardly know what to say—abandoned
 in a way."

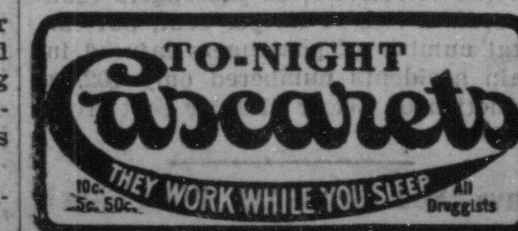

"But you were with your father, in
 his care."

"I know, but I was getting con-
 fused. Until then the excitement had
 kept me from thinking. But you made
 me think. I began to wonder, to ques-
 tion. But what could I do?" She sig-
 nified her helplessness with a quick
 and dainty movement of her hands.
 "He is my father, and I'm not yet of
 age, you know."

"Protection!" she echoed warmly.
 "If you call it that!"

"Kidnaping," he said thoughtfully.

"I presume that'd be the charge."

"Oh!" She laughed the notion to
 scorn. "Besides, they must catch us

"Of course, and"—with a simulation
 of confidence sadly deceitful—"they

PETROSINO CANDLE.

Memorial to Murdered Detective
 to Last 1,885 Years.

FINEST EVER CONSTRUCTED.

In a Cathedral at Padua, Italy, It Will
 Be Lighted Only on Every Candle-
 mas Day—Nine Feet High and
 Weighs 178 Pounds.

The mammoth memorial candle made
 in honor of Lieutenant Joseph Petro-
 sino, the murdered New York detec-
 tive, will burn in the little cathedral
 of St. Michael in Padua for nearly
 twenty centuries.

Although originally constructed by
 a New York firm to burn continuously
 for five years and two months, the
 citizens of Padua, in Italy, Petrosino's
 birthplace, desiring to perpetuate the
 memory of the martyr through thou-
 sands of generations, have persuaded
 the widow to burn it only on Candle-
 mas day, the 2d of February each
 year. This allows the candle to last
 precisely 1,885 years.

One of the firm who made the can-
 dle recently received a letter from
 the mayor of Padua, Signor Michel-
 angelo di Stefano, making this request
 in behalf of the citizens of his city,
 and Mrs. Petrosino readily consented.

"It is so beautiful to think that our
 children and our children's children
 for generations will be able to cross
 the ocean and still see a light burning
 in honor of their father," said the lit-
 tle widow, bravely struggling to hide
 her tears. "Of course I would like to
 have the candle always burning and
 near me. But in New York it is not
 safe, and then Joe's friends and rela-
 tives want his birthplace to have some
 memento to which they can do honor."

The mayor in his letter says, "We
 know of no other way in which to
 consecrate the memory of our great
 Joe and to have his life ever shining
 before the youth of our city as our
 finest example of noble manhood."

At his suggestion the name, "Joseph
 Petrosino, Detective," with the date
 "1909," has been placed on the base
 of the candle. Encircling this are the
 words, "A Martyr to Justice." When
 the candle has at last burned low and
 only the barest stub is left the charred
 wick and the bit of wax with this in-
 scription will be placed among the
 relics of the church.

The candle was designed to be en-
 shrined in the procathecal on Mott
 street, New York, but threats of the
 Black Hand in the neighborhood led
 the makers and the widow to change
 the location.

While the Petrosino candle is not the
 largest one ever constructed, it is the
 finest. It is nine and one-half feet
 high and has a circumference of two
 feet six inches. It weighs 178 pounds.
 From within one foot of the tip to one
 foot of the base it is embossed with
 14 carat gold, laid on in octuple leaf.
 The centerpiece, all pure gold, shows
 lilies of the valley and a repro-
 duction in miniature of the holy col-
 lege. The laying on of the gold and
 the fabrication of the design were the
 work of two men, who kept at their
 task thirty-six hours, with only a brief
 intermission for eating and sleeping.

The bare cost of the candle, not count-
 ing the labor and the reward for the
 ingenuity of its construction, was \$450.
 It is not a molded candle and is
 composed of 178 beeswax wrappings
 coated on the wick by slow dipping
 into the vat of beeswax. To facilitate
 this process a derrick twenty feet high
 was built. As the candle stands it can
 be picked off like an onion. The ad-
 vantage of this method is that it can
 withstand much more heat and jarring
 without bending.

Artists from all over the United States
 have visited the candle shops and ex-
 claimed that both in design and con-
 struction the Petrosino candle has
 never been equaled.—New York Globe.

Women Taking Up Sculpture.

Many young women ambitious to
 win fame as artists are now handling
 mallet and chisel as sculptors. It is
 an art still new to women, although
 there are several women sculptors of
 international reputation. Mrs. Adelaide
 Johnson is even better known in Eu-
 rope than in America, and she has re-
 peatedly carried off prizes in competi-
 tion with the best of English and
 French sculptors. She lived for many
 years in London, but now expects to
 do most of her future work in New
 York. She has wrought wonderfully
 lifelike busts of many of the best
 known of American women.

Miniature Theater in Lighting Show.

A miniature theater will be one of
 the many exhibits at the coming June
 convention of the National Electric
 Light association at Atlantic City. A
 small stage will be shown, with the
 footlights, are lights, spot and bunc
 lights operated just as in a regular
 theater, the idea being to show the
 dependence of the drama on electricity.
 The model is said to have cost several
 times the weekly salary of a popular
 Broadway star.

An All Clergymen Ball Team.

The Rev. John L. Scudder, pastor of
 the First Congregational church of
 Jersey City, is forming a baseball club
 to be composed of clergymen. "Don't
 imagine for a moment," he said the
 other day, "that the club will not play
 good ball. I can catch and swat the
 horsehide for keeps and know half a
 dozen clergymen who were dandy
 players at college. I'm going to play
 first base."

INDIANA DRY MOVING ALONG

Three Counties Vote to Oust Saloon
—Owen and Crawford Counties
Dry Under Remonstrance.

WOMEN PLAY A STRONG PART

Result in Madison County, in Which
Three Cities are Located, is
Attributed to the Women.

Anderson, Ind., May 27.—Madison county voted "dry" Wednesday by a majority of 1,470, the result being somewhat unexpected. It is believed that the anti-saloon victory is due almost entirely to the women and children, who made a house-to-house canvass, appealing for the abolition of the saloon on personal grounds. The majority of business men and large taxpayers voted and worked to retain licensed saloons, but they were outnumbered. A heavy vote was polled and the election was orderly. The "wets" fell down at Alexandria, where they expected to win. They lost Alexandria by nearly two hundred. Elwood also went "dry" by a majority exceeding five hundred. Pendleton and the smaller towns, from which saloons were excluded by remonstrance, rolled up big "dry" majorities. Both sides made a desperate fight, property interests being lined up against sentiment. The "dry" element is gloating over the victory today. Returns show that a majority of the farmers voted "dry." The Anti-Saloon league crowd was well financed for the election. While a heavy rain fell all day the vote is said to be the largest ever cast here. Anderson gave a majority of several hundred against the Anti-Saloon league, but the loss of Elwood and Alexandria cost the liberal element the county. There are 107 saloons and a brewery in the county.

Two Other Dry Counties.

Indianapolis, May 27.—In the local option election held in Owen county Wednesday the saloons were voted out by a majority of 950. The Crawford county election also gave a victory to the "drys" by a majority of about 800. Both of these counties had been "dry" under operation of the remonstrance law.

DIED OF INJURIES

Purdue Professor a Victim of Accident
at Athletic Meet.

Lafayette, Ind., May 27.—Prof. Benjamin Martin Hoak of the Purdue university faculty is dead of injuries received at the state interscholastic track and field meet on Stuart field Saturday afternoon, when he was struck by a twelve-pound hammer thrown by Guy Conwell, a member of the track team of Van Buren (Ind.) high school.

Professor Hoak was watching the field of runners at the time the hammer was thrown, with his back turned toward the hammer thrower. The heavy missile struck him on the right side of the abdomen. Death resulted from acute peritonitis.

Professor Hoak had been a member of the Purdue faculty since 1893.

Justice Moved Rapidly.

Washington, Ind., May 27.—Monday afternoon Robert Wilson, claiming Mt. Vernon, Ind., as his home, had recorded at the courthouse a deed for a farm of 120 acres near this city owned by James Coslet of Douglass county, Ill. Yesterday he applied to William Beck for a mortgage loan of \$3,500 on the farm. Coslet declared the deed a forgery and Wilson was arrested. He pleaded guilty. Judge Houghton sentenced him, and in a few hours the sheriff started to Jeffersonville prison with him to serve from two to fourteen years.

Murderers to Be Executed.

Peru, Ind., May 27.—Government authorities have notified the relatives of Miss Anna Hann, here, that her Filipino murderers have been ordered executed. Miss Hann was a native of this county. When the United States government called for school teachers to go to the Philippines several years ago Miss Hann responded. A year ago she was found murdered in her room and her trunk had been searched. She had been hit over the head with an ax.

Thompson's Horrid Mistake.

Indianapolis, May 27.—Mistaking her for a burglar, George W. Thompson shot and instantly killed his wife last night in their home at 56 East Tenth street. The police believe Thompson's story that the killing of the woman was not intentional, but awaiting action by Coroner Blackwell they will hold him on the charge of manslaughter.

Deadly Boiler Explosion.

Dowagiac, Mich., May 27.—Five men were killed and several injured by a boiler explosion here.

BIG TESTING MACHINE

Bridges Made Safe by the Use of
New Device.

EVERY STEEL PIECE IS TESTED

Engineers Say Powerful Apparatus
Will Revolutionize Structural Work
Over Water—Bill Before Congress to
Authorize Building of Still Larger
Test Machine.

According to civil engineers, the vertical compression test machine of 10,000,000 pounds capacity, which is being built by a well known firm in Philadelphia for the structural material testing laboratories of the United States geological survey, will revolutionize the building of bridges in the United States, making such an occurrence as the collapse of the Quebec bridge with attendant loss of life impossible.

This machine, with a gross weight of more than 200 tons and an extreme height above the foundations of about eighty feet, is by far the largest testing appliance ever constructed. Engineers seen recently said that the reason there is always so much uncertainty about the strength of a great bridge is because no machines have ever been constructed of sufficient power to test the great columns of steel used in them.

It was pointed out that every piece of steel used was subjected to a specified test, the engineers knowing the quality of the material used and basing their calculations on the strength of column or cord thereon. But the actual strength of the ponderous piece of steel was in the last analysis known on paper only, and the statement was repeatedly made that had there been in existence such a machine as that the government is now having constructed the weakness of the Quebec bridge would have been known before it was too late.

The nearest approach to the proposed government machine is the celebrated Watertown arsenal machine, Watertown, Pa., designed by A. H. Emery of Stamford, Conn. The enormous cost of such a machine as the government has contracted for has until now been the obstacle between the private plants and its construction, and even when the Philadelphia firm was first engaged to construct this machine it was not designed to have it larger than necessary to test the large blocks of stone being used in government and other buildings throughout the United States.

But the supervising architect of the geological survey urged that the capacity of the machine be extended so as to test whole columns of brick, stone, concrete and even of steel, and accordingly the original clearance between "the heads" was increased from twenty-five to sixty-five feet. Now, since the purpose of the government has become known, the department is being flooded with letters urging its early completion that it may be used not only in the cases of bridges already under construction, but to test built up structures as well.

The machine in simplest form is nothing more than a huge hydraulic press with one adjustable head and a weighing system for recording the pressure developed in it by means of a triple plunger pump. Between the base of the machine and the adjustable head when removed to the farthest point is a distance of sixty-five feet; consequently the machine is capable of testing the supporting strength of a column more than sixty feet in length.

Some idea of the size of the machine may be obtained from a statement of the weight of its principal parts. The castings for the base and the top head weigh approximately 50,000 pounds each. Each main screw will weigh over 40,000 pounds, the lower platform about 25,000 pounds and the main cylinder 16,000 pounds. The top of the machine will be about seventy feet above the floor, and the concrete foundation upon which the machine rests will be about eight feet below the floor line.

So many letters were sent to members of congress and to the department of geological survey congratulating the government on taking the initiative in the construction of such a machine that Senator Teller has introduced a bill providing for another machine more than twice as large as the Philadelphia firm's apparatus, having 11,000 tons capacity in compression and 5,500 tons in tension, taking columns or cords 100 feet long.

Mr. Emery, designer of the Watertown machine, is named in the bill as designer and builder, and the price, including the machine and two eighty-ton cranes, is fixed at \$1,750,000. In addition, \$200,000 is to be appropriated for a building to house the machine.

According to the specifications, this machine will be able to give and weigh loads of tension up to 11,000,000 pounds and loads of compression up to 22,000,000 pounds. The machine is to be provided also with tension holders to test round, square and rectangular bars up to 3,300,000 pounds, with lengths up to 100 feet.

The bill explicitly states that if the compression cords of the Quebec bridge had been tested by such a machine their weakness would have been discovered in time to save the structure.—New York Times.

LORIMER GETS ILLINOIS PLUM

Chicago Congressman Dashes the
Hopes of Hopkins—Votes Shift
to the Chicagoan.

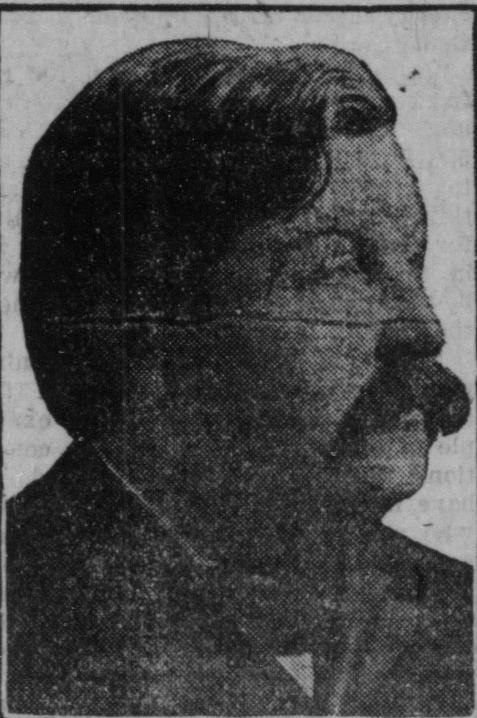

LONG DEADLOCK IS BROKEN

On Fifty-Ninth Ballot, Illinois Legis-
lature Elects Wm. Lorimer to
Succeed Albert J. Hopkins.

Springfield, Ill., May 27.—William Lorimer, congressman, of Chicago, was elected United States senator to succeed Albert J. Hopkins, whose term expired March 4 last, breaking the long deadlock.

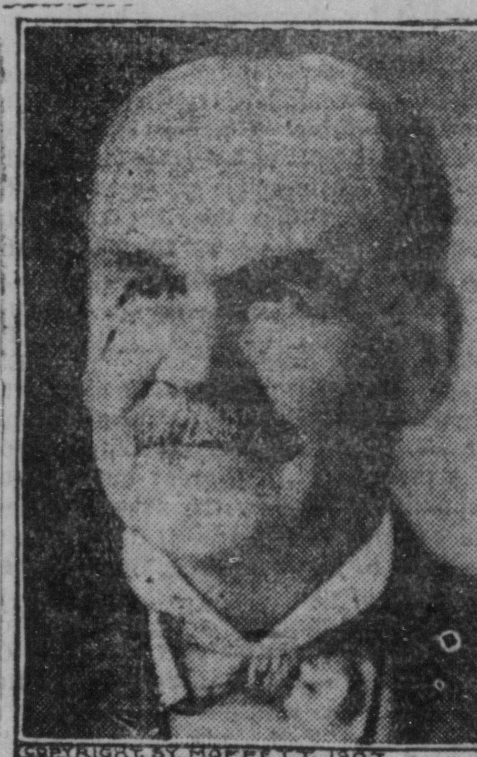

Among the Democrats who voted for Lorimer was Lee O'Neill Browne, Democratic leader in the senate.

The men who switched and promised to break the deadlock consumed much time in explaining their votes. For instance, Browne said that a great

WILLIAM LORIMER.

responsibility rested on his shoulders, and implied that if he could afford to vote for Lorimer, other Democrats could do the same. As each vote was added to the Lorimer list shouts of approval filled the hall. While the voting was going on Mr. Lorimer, calm and apparently unexcited, strolled through the corridor back of the speaker's seat. As the roll call progressed the Shurtleff men all shifted

ALBERT J. HOPKINS.

to Lorimer. Foss men, notably Ap-madoc, Church, Pierson, Butts, Field-stack, Kowalski, McLean and Price also went to Lorimer. There was joy in the Lorimer camp when Representatives Lawrence, Logan and McMacklin, hitherto staunch Hopkins men, voted for Lorimer.

William Lorimer was born in Manchester, England. His home is in Chicago. He was elected from the Second Illinois district to the Fifty-fourth, Fifty-fifth, Fifty-sixth, Fifty-eighth, Fifty-ninth, Sixtieth and Sixty-first congresses.

Speaker Shurtleff cast the vote in the joint assembly which insured Lorimer's election. When the speaker's name was reached on the house roll call 88 votes had been cast in the house and 12 votes had been cast in the senate for William Lorimer, making a total of 100 votes. Shurtleff's was the 89th vote in the house and the 101st vote in the joint session for Lorimer, which gave the senator-elect a majority of the 200 senators and representatives who were present and voting.

Lorimer's election was not dependent upon a majority of those present and voting. He also received a constitutional majority of 102 votes and had, before the vote was announced, six votes to spare. With the casting of Shurtleff's vote the members of the legislature and the vast throng that filled the house galleries knew that the deadlock was broken. Pandemonium broke loose.

Fifty-five Republicans and fifty-three Democrats voting together brought about Lorimer's election and broke the long-standing deadlock.

EAGER FOR AIRSHIPS.

Orders Flood Wright Brothers,
Who Cannot Supply Demand.

AN INQUIRY FROM ICELAND.

Shah of Persia Also Wants an Aero-
plane—Eighty Airships Ordered in
America—Chinese Mandarin Wants
One—Many Applying For Instruction
in Flying.

More than eighty orders for airships to be used in the United States are now in the hands of the Wright brothers, Orville and Wilbur. Since their demonstration of their ability to handle their aeroplanes with safety and to teach others how to do so they have been flooded with letters asking for terms for the building of the machines and instruction in flying. The branch of the International Aero club which was organized at Dayton, O., recently for the purpose of exercising some supervision over prospective users of heavier than air devices has received many applications for membership, some of which have come from well known men of wealth throughout the United States. For the present their names are kept secret by the Wrights.

The American orders, however, are only a part of those that are coming in the heavy mail of the inventors. News of their achievements has penetrated to far parts of the world. From Iceland in the last few days has come an inquiry as to the cost of delivering an aeroplane and sending an instructor to that far northern island. The shah of Persia, perhaps remembering one occasion when he had to escape from his palace by stealth and desiring to have a new device to defeat the revolutionaries, has asked that a machine be constructed for him as soon as possible. A Chinese mandarin who is one of the leaders in the awakening of that empire to western civilization has also sent an order.

The Wrights will be unable to fill all their orders because their factory is too small for the work. They will enlarge its capacity greatly this summer and hope to be able to meet all demands made upon them. Another trouble they are having is in obtaining a sufficient quantity of steel of the exact grade to keep the present factory working up to capacity. They are endeavoring to make arrangements with steel mills to make them a supply in future, but are having some difficulty in doing so.

That the operations of the Wrights need not be restricted for want of capital is shown by the fact that they have refused an offer since their return for the investment of a large sum in their enterprise. This offer came from well known New York capitalists, who believed that the operations of the Wrights should be greatly enlarged. They declared, however, that they had sufficient money of their own to carry on their work.

FASHION VERSUS BEAUTY.

Boston Sculptor Tells How Female
Form Is Being Ruined.

That woman's figure has been ruined by slavery to fashion is the declaration of Hugh Cairns, the Boston sculptor. He says:

"Woman's figure is getting poorer and poorer every year. The women of today are getting farther and farther away from the Greek figure of 2,000 years ago.

"As one instance of this, those who determine what is fashionable are trying to bring the waist line farther down all the time. At present an effort is being made to get it down as low as the hips. This is all wrong, of course, for nature long ago determined that it should be just below the breast, allowing a soft, graceful line from hip to armpit. So long as fashion dictates that the waist shall be close to the hips, so long will we have women with bulging, lumpy hips and other deformities.

"If women would have just such a waist as they seek—the beautiful that we see in classic paintings and sculpture, the waist that characterized the ancient Greek woman—let them avoid fashions."

To Dinner Via Balloon.

Going to dinner forty-two miles away in a balloon was the experience of N. H. Arnold, A. D. Converse and W. H. Richardson, who recently ascended at North Adams, Mass., in the North Adams No. 1. The balloon was sailing near the ground over the farm of George W. Hodges at Greenfield Center, N. Y., when two of the farmer's daughters invited the party to come down and have dinner, and they did.

Tribute to George Meredith.

Died May 18, 1909.
He listened to the mighty lyre of earth
And learned the lore of soul compelling song.
He pondered on the rune of right and wrong
And saw the hearts of men, their woes, their mirth.
In him our vision had a second birth.
For by his words we saw as through some strong
Enchanter's lens the conscience of the throng
The fount of ill, the hidden source of worth.

Shall death claim him, on deathless knowledge reared?
Shall dreams o'ertake the master of the dream?
Nay: his the perfect love that never feared
His words send through our grief a radiant gleam—
"With Life and Death I walked, and Love appeared
And made them each a shadow seem."
—Joyce Kilmer in New York Sun.

CANNON'S HOT SHOT.

Speaker of the House Ridicules Uplift Movement.

"PURE ROT," SAYS UNCLE JOE

Declares Former President Roosevelt's Country Life Commission Is a "Flat Failure"—Has No Patience With Attempt to Relieve Conditions That Are Not Understood.

Speaker Joseph G. Cannon in a recent after dinner speech before the national city planning conference in Washington dealt some hot shot to one of former President Roosevelt's pet commissions and other curiosities of the uplift movement.

The speaker took the following falls out of the uplift:

"Don't try to relieve conditions that you don't understand."

"This country life commission that has been trying to uplift the poor farmer with theories! I'll take oath that they don't know what they are talking about."

"What they have compiled is pure rot. The commission is a flat failure."

"The idle rich * * * bear about the same relation to the great mass of the American people that the fly on the elephant's trunk bears to the elephant."

"The people who do the most harm are those who give to what they call charity either for notoriety or to bribe God."

"It is well enough to plan for the future of this country," said Mr. Cannon—"this country which is to have 500,000,000 inhabitants in the years to come. There are a great many things which can be done in planning for those years, but no plans that we in this generation can map out will be big enough or broad enough to meet the coming needs."

"I bid godspeed to this planning that you are working for, but for heaven's sake don't follow the example of some and try to relieve conditions that you don't understand. I have no patience with those theorists who are trying to relieve what they are pleased to call the agricultural section of this country. There are several excellent gentlemen on the country life commission, but what they have compiled is pure rot, if what I have read of it is a fair sample. The country life commission is a flat failure because it has dealt with conditions that didn't require dealing with by theorists and because its members don't know what they are talking about."

"Open the sensational newspapers and the magazines and you will read all about the activities of the idle rich, their foolishnesses and their fads. They are of no real consequence. They bear about the same relation to the great mass of the American people that the fly on the elephant's trunk bears to the elephant, but they give the excuse for demagogues, who live not by the sweat of their faces, but by the sweat of their tongues, to inveigh against economic conditions existing in this country. That is why they constitute a real evil. Once in awhile when other methods of seeking notoriety have failed they declare themselves to be friends of the people and proclaim themselves to be Socialists."

"I don't regret immigration. I would not be here if it wasn't for that. I'd be scattered over the continent of Europe. There'd be a little of me in the Low Countries, a mite in France, a portion in Ireland, some more in England and Scotland. The great bulk of our immigrants live by the sweat of their faces, and any one who does that is worthy to be given recognition in this country of ours."

Mr. Cannon paid a high tribute of respect and admiration to Mrs. V. G. Simkhovitch of New York, a settlement worker, whose work centers in a block in a New York city street in which more than 1,000 persons live. Mrs. Simkhovitch spoke in a quiet but effective manner of her labors in this congested district, where the work of the settlement worker is so often beset with trials that demand forbearance and endless patience.

The speaker found every reason to believe that the world is growing better each day and deprecated the existence of pessimists whose chief mission is to flout discouragement before the eyes of the public.

Bronze Badges For Cuban Service.

All the officers and men of the United States army who served in Cuba during the period of pacification from Oct. 6, 1906, to April 1, 1909, will receive from the government a service badge with ribbon in recognition of that service. The badge and ribbon will be issued as a part of the army uniform, gratuitously to enlisted men and at cost price to officers. This action is taken by direction of President Taft. The badge will be of bronze and will be similar in general design to the badges previously authorized for services during the Spanish war and the Philippine insurrection.

American Shoes For Dutch Princess.

The tiny feet of Holland's baby princess, daughter of Queen Wilhelmina, are to be incased in American soft soled shoes, the most costly infant's shoes that were ever made in the United States. They bear the stamp of a Brockton (Mass.) firm. There are seventeen pairs in the order recently finished. In one of the seventeen pairs the lining is a piece of satin from Queen Wilhelmina's wedding gown. Another pair is made of cloth of gold, one pair is of cloth of silver, and still another is of the finest white Parisian kid.

REPUBLICAN IS GOOD AS BYRON

That's What Joe Cowing Writes From Denver—Has His Picture in the Times.

MEETING RUSHVILLE PEOPLE

The Presbyterian Assembly Delegate Says Convention is the Greatest he Ever Saw.

In the Denver Times Monday evening appeared a good picture of Joseph L. Cowing of this city, talking to a New York minister. Mr. Cowing explains the matter, and also tells how he is enjoying his stay in the following letter:

I send to you today a copy of the Denver Times and on page six you will see a familiar face and I hope you will not think I am a "Joplin Millionaire Worth" as this did not cost me a cent, but I happened to be standing in front of the camera when it snapped and the man asked me my name.

I was holding a copy of your Republican in my hand so you see you had a part in it. I have been sending you some of the Denver papers. They all have what I call "Scare Head Lines" in red.

The General Assembly is the greatest meeting I have ever attended and we have some big men who are commissioners as you can see.

We have seen a number of former Rushville people, Hodge Cliff and wife, Mrs. Lottie Michael Binges, Tony Michael, Lizzie Michael and James Mitchell, who was once a dry goods merchant in Rushville.

We leave here next Monday, so please do not send the Daily Republican later than Saturday, May 29, but send me Saturday's paper. We enjoy the paper very much as it is as good as a letter from Byron. My wife is enjoying the meetings as much as I am. I go from here to Colorado Springs, and then to Newton, Kansas, before coming home.

With regards, I am, yours
J. L. COWING.

BY THE WAYSIDE

The telephone girl sits still in her chair and listens to voices from everywhere. She hears all the gossip, she hears all the news, she knows who is happy and who has the blues; she knows all our sorrows, she knows all our joys, she knows every girl who is chasing the boys; she knows of our troubles, she knows of our strife, she knows every man who is mean to his wife; she knows every time we are out with the boys, she hears the excuses each fellow employs; she knows every woman who has a dark past, she knows every man who's inclined to be fast; in fact there's a secret 'neath each saucy curl of that quiet, demure looking telephone girl. If the telephone girl would tell all that she knows it would turn half our friends into bitterest foes; she would sow a small wind that would soon be a gale, engulf us in trouble and land us in jail; she would let go a story (which gaining in force) would cause half our wives to sue for divorce; she'd get all the churches mixed up in a fight and turn all our days into sorrowing nights; in fact she could keep the whole town in a stew if she'd tell the tenth part of the things she knew. Now doesn't it make your head whirl when you think what you owe the telephone girl.

Oh! you DEMMERS BOND.
